## eTT-16

The eTT-16 continues the tradition of innovation at Eagle by incorporating the latest zero emission, energy-efficient, 80v A/C electric drive. This Four Wheel Drive and Four Wheel Steer vehicle is incredibly maneuverable for its size and will perform in any weather condition for business and regional aircraft. If your goal is to go green, the Eagle eTT is the most Eaglelogical choice.

The eTT features an ergonomic front operator compartment that can accommodate an operator and two passengers. Operators will benefit from the low profile design allowing for front and rear hitch visibility coupled with the standard inching feature for simple and efficient hitching. The optional “smart charge” battery and charger system allows the battery to be opportunity charged to maximize efficiency, with no reduction in battery life cycle. A secondary traction battery can be added for longevity during increased periods of use.

Eagle has been manufacturing the industry’s most reliable and functional tow tractors for over 45 years. Designed and manufactured in the United States, the eTT Series is backed by factory direct service and support. With a robust product line and the strongest warranty in the industry, we pride ourselves on providing the highest level of quality and customer service. At Eagle Tugs, we earn our wings without ever leaving the ground.
