New Product

Tronair offers a variety of Ram Air Turbine test equipment and RAT actuator adjustment tools that are OEM and Airframe approved. The units provide the power and speed capabilities consistent with the requirements of the ground checkout procedures and attaches easily to the RAT gearbox. The motor provides the exact torque curve required to properly test RAT performance.

Tronair currently manufactures test equipment for Airbus: A318, A319, A320, A321, A330, A340, [A380](#); Boeing: 747-800, 787; Bombardier: Challenger, CRJ; CASA: A400M; Dassault Falcon: 7X; [Embraer](#): ERJ-170, ERJ-195; Gulfstream: G650; Sukhoi: SuperJet 100

Spotlight Product

Tronair has added the [03-5840-0000](#) Falcon 7X stabilizing stand to our product line. Tronair manufactures a full line of stabilizing stands for many business aircraft including Cessna, Dassault, Gulfstream and LearJet. The stabilizing stand can be equipped with an alarm that blasts a warning when weight on the load cell exceeds 100 pounds.

"The stabilizing stand alarm has saved me thousands of dollars in damage by preventing us from lowering the jacks and not removing the stabilizing stand. This is another great Tronair product!" Service Center General Manager, Battle Creek, MI

News

Gulfstream Approves JETporter!

Gulfstream has added the JP100S electric towbarless tug, with a maximum towing capacity of 100,000 lbs, to their Ground Support Equipment Catalog.

Other JETporter models include the JP30/JP30L and JP75 with maximum towing capacities of 30,000 lbs and 75,000 lbs respectively.
