

New Product

To kick-off 2011, Tronair introduces 3 new OEM approved commercial aircraft jacks for the Boeing 737-300 through -900 fleet. The CE approved main, nose and aft jacks standard features include adjustable leveling feet with leveling bubble, air driven hydraulic pump, threaded ram with hand wheel safety nut, quick rising center extension, easy access filler/breather cap, steel reservoir with sight gauge and a heavy duty towbar. An operator platform and ladder are standard on the aft jack. The 02A7895C0100 main jack has a 40 ton capacity, the 02A7896C0100 nose jack and 02A7897C0100 aft jack have a 15 ton capacity.

Spotlight Product

The 07-3013-0900 Fuel System Leak Test Unit for the Sikorsky S-92 and S-76 helicopters has two pumps driven by air operated motors to vary the flow from 1/2 to 12 gpm.

The filter system removes 98% of particles for exceptionally clean fuel. The unit comes standard with three flow meters to accurately measure the flow. Two optional hose kits are available for testing the engine (K-4409) and APU (K-4410) systems.

The 06-5073-0800 Constant Speed Drive (CSD) Service Cart, designed to service Pratt and Whitney 2040 engines, allows you to service engine oil and recover any overflow in its 5 gallon detachable waste tank. The unit comes standard with an inline totalizer with pint graduations, 2 micron filtration, high displacement hand pump and quick disconnect couplings.
