

Work Stands

Tronair recommends performing preventative maintenance on Work Stands.

Model Number _____ Serial Number _____

Maintenance Performed By _____ Date _____

Before Each Use: Visually inspect unit to ensure all components are present and functional

- All component casters, handles, hand rails, safety chains, lock pins, etc...
- Frame is sound and free of damage (welds, support tubes, base supports)
- Load rating is never exceed
- Check all hydraulic components for seepage and leaks. **Never use if hydraulic leak is found!**
- Check hoses for damage, and no pinch areas throughout stand operation. **Never use if hydraulic leak is found!**
- Ensure safety stops, if equipped, are present, work, and have no signs of damage
- Platform and steps free of damage, debris and free of slippery contaminates (oil, hydraulic fluid, cleaning chemicals, etc...)
- Aircraft protection bumpers are in place and not damaged

**WARNING! Ensure lift components are free of damage and or excessive wear.
Never use lift if any component is bent or broken**

Periodic Maintenance:

- Lube casters and hinge points
- Ensure all fasteners are present and secure
- Fluid levels in hydraulic systems
- Test operation in controlled environment. Ensure stand has full range of motion, test safety stops for effectiveness
- Load test may be required, check with manufacturer for test weight
