

NEWS RELEASE

Tronair Tier 4 Final Diesel Ground Power Unit

April 10, 2018

Holland, Ohio

Tronair, Inc. (“Tronair”), a portfolio company of Golden Gate Capital is proud to announce the release of the newest diesel ground power unit. Tronair remains ahead of the curve with the latest Tier 4 Final emissions compliant diesel Ground Power Unit. This GPU is designed to serve as a 28.5 volt DC power source for parked aircraft providing up to 600 amps continuous for aircraft servicing and 2,000 amps peak for starting. This Tronair GPU requires no diesel particulate filter or DEF fluid instead using a DOC oxidation catalyst, reducing maintenance interval requirements and improving fuel economy.

The Doosan diesel engine has electronic controls for more precise control over engine performance. The innovative new digital controller and display system leads to simple operating procedures while also providing the necessary information for troubleshooting and diagnostics.

Peter Heydinger, Principal Engineer leading the design and development of the GPU says: “The design of this unit is centered on simplistic functionality and consistent reliability. The components used on the GPU are used in numerous applications worldwide guaranteeing longevity and low maintenance costs.”

Tronair has been a leading ground support equipment manufacturer since 1971. Extensive engineering capabilities and customer collaboration drive innovative solutions that support safe and efficient aircraft ground operations and maintenance. Designed and manufactured in the United States, Tronair’s GPU product line is backed by factory direct service and a worldwide support network.

About Tronair:

Tronair is the global leader in the design, manufacture, and sale of GSE for business, commercial and military aircraft. Tronair's broad product line of GSE, comprised of over 1,500 products, is used by over 350 unique aircraft platforms. Tronair emphasizes innovation, reliability, customer focus, and building quality equipment to exceed customers' expectations. As a result, Tronair enjoys an excellent reputation with aircraft OEMs, fixed based operators, maintenance and repair providers, corporate hangars, commercial airlines, defense contractors and military airbases around the world. Tronair is based in Holland, Ohio and has been in operation since 1971. www.tronair.com

About Eagle Tugs:

Eagle Tugs has been manufacturing the most reliable and functional tow tractors for the aviation, cargo handling and industrial towing markets since 1970. Eagle Tugs are designed and manufactured in the United States and are backed by factory direct service and support. With a robust product line and the strongest warranty in the industry, Eagle Tugs provides the highest level of quality and service to customers globally. In addition to several industrial uses, Eagle Tugs can move fixed-wing and rotorcraft aircraft of most any size across the military, commercial, regional and business aviation and cargo markets. . www.eagletugs.com

About Malabar:

From its founding in 1935, Malabar has been a key supplier of ground support and maintenance equipment for commercial and military aircraft. Malabar's primary business has been aircraft jacks, including axle jacks for changing aircraft wheels and tires and tripod jacks for in-hangar service of narrow-body and wide-body aircraft. Today, Malabar sells product in over 60 countries around the world and the product line has expanded to include B787 and A350 coolant service carts, hundreds of different types of fluid dispensers, test stands, weigh equipment, strut service equipment, nitrogen/oxygen equipment, wheel/brake equipment, engine stands as well as the spares, service and replacement parts associated with each product line. Malabar has a worldwide reputation for quality and service, with 24-hour online product support including emergency parts supply. www.malabar.com

About Columbus Jack / Regent:

Columbus Jack is the largest supplier of hydraulic jacks to the U.S. military and a leading supplier of hydraulic jacks to the commercial aerospace market. Columbus Jack consistently complies with tough military standards, which aligns well with their culture of quality and customer service. Columbus Jack was founded in the 1940s as a supplier to the U.S. military. Regent was founded in 1929, and over the course of time, has served most of the world's airlines, airframe and aerospace manufacturing companies. www.columbusjack.com

About DatcoMedia:

DatcoMedia, via its EBis software products, is the leading SaaS provider for the aviation ground services and equipment market. EBis products were developed to meet the strict requirements of the FAA and customers for aircraft and ground support equipment repair, scheduling, planning, purchasing, inventory control, utilization optimization and resource allocation. EBis is the system of record for thousands of users globally, including several of the largest global airlines, ground handlers, jet centers, engine repair shops and FBOs of all sizes. DatcoMedia was founded in 1999 and is based in Chicago, Illinois. www.datcomedia.com

About Golden Gate Capital:

Golden Gate Capital is a San Francisco-based private equity investment firm with over \$15 billion of capital under management. The principals of Golden Gate Capital have a long and successful history of investing across a wide range of industries and transaction types, including going-privates, corporate divestitures, and recapitalizations, as well as debt and public equity investments. Notable investments sponsored by Golden Gate Capital include Cole-Parmer, ANGUS, Springs Window Fashions, Humanetics Innovative Solutions, EP Minerals, and U.S. Silica.
